

N. MANIKANTA

Network Engineer Trainee | NOC Engineer | L1 Network Troubleshooting

Vijayawada, Andhra Pradesh, India | Phone: 8790367989 | Email: nmanikanta.cse2025@gmail.com

CAREER OBJECTIVE

B.Tech Computer Science and Engineering graduate with CCNA training and hands-on practice in Cisco networking, VLANs, trunking, inter-VLAN routing, DHCP, routing, switching, and network troubleshooting. Seeking a Network Engineer Trainee / L1 Network Support / NOC role to apply networking fundamentals, troubleshooting skills, and a strong willingness to learn enterprise network technologies in a 24x7 rotational shift environment.

TECHNICAL SKILLS

Networking Fundamentals: OSI Model, TCP/IP, LAN/WAN, IPv4 Addressing, Subnetting, ARP, ICMP, DNS, DHCP, NAT, VPN, IPsec

Routing & Switching: Static Routing, RIPv1/RIPv2, OSPF, EIGRP, BGP, Routing Tables, VLANs, Access/Trunk Ports, 802.1Q, Inter-VLAN Routing, STP Fundamentals

Cisco Devices: Basic Router/Switch Configuration, Interface Configuration, Show Commands, Connectivity & Port Troubleshooting

Troubleshooting: Ping, Traceroute, ipconfig/ifconfig, nslookup, Interface/Port Status, IP Reachability, Packet Loss & Latency Basics

Tools: Cisco Packet Tracer, Wireshark, tcpdump, Servicenow, Nagios

Systems: Linux Fundamentals, Windows Fundamentals, Basic Azure/MCSE Concepts

Professional Skills: Analytical Troubleshooting, Communication, Documentation, Teamwork, Willingness to Work Rotational Shifts

NETWORKING HANDS-ON LABS

- **VLAN & Inter-VLAN Routing Lab** — Created VLANs, configured access/trunk links, and enabled inter-VLAN communication using router-on-a-stick / Layer-3 concepts.
- **DHCP Lab** — Configured DHCP pools, gateways, and client address allocation; verified connectivity and troubleshooting.
- **Routing Lab** — Practiced static routing and RIPv2, verified routing tables, and tested end-to-end reachability.
- **VTP Lab** — Practiced VTP server/client concepts, VLAN propagation, and switch port assignment.
- **Basic ACL & DNS Lab** — Practiced traffic filtering concepts and DNS-based name resolution in a combined Packet Tracer environment.
- **Troubleshooting Practice** — Diagnosed interface status, IP configuration, gateway, routing, and connectivity issues using Cisco CLI and end-host commands.

TRAINING & CERTIFICATIONS

- CCNA — Networking Training, Zoom Technology
- MCSE / Microsoft Infrastructure & Azure Basics — Training
- Cisco Networking Hands-On Practice using Packet Tracer

EDUCATION

B.Tech — Computer Science and Engineering, Amrita Sai Institute of Science and Technology (2021 – Present, CGPA: 7.03)

Intermediate (MPC), Jaggaihpeta Residential College (2019 – 2021, CGPA: 7.4)

10th Standard, Don Bosco Boys High School (2018 – 2019, CGPA: 8.5)

ROLE ALIGNMENT

- Prepared for L1 network troubleshooting involving link-down, connectivity, latency, packet-loss, and basic routing/switching issues.
- Comfortable documenting incidents, following SOPs, performing initial diagnosis, and escalating unresolved issues to L2/L3 teams.
- Strong interest in enterprise networking and readiness to learn Cisco routers/switches, NOC processes, and service-provider environments.
- Willing to work in a 24x7 rotational shift environment.
